14.00	

After 34 years with the City of Miller, I feel we have accomplished many things. Building a new electric system while keeping our rates among the lowest in the state is something this community should be proud of. This was done by the council and the employees working together. Every board member and employee should take a moment to pat themselves on the back. I know that sounds kind of corny, but I didn't know any other way to say it. That being said, this is my letter of resignation. I will be retiring on April 10, 2020. Thank you for a great career with the City of Miller!

A handwritten signature in black ink that reads "Bill Lewellen". The signature is written in a cursive, flowing style with a large initial "B" and a long, sweeping underline.

Bill Lewellen

Subject: Surcharge

The ordinance which was effective January 2020 is perfect. The following statute gives the city the authority to charge rates as they have established. Snow birds and seasonal users pay for the standby or ready-to serve benefits.

9-40-15.1. Collection of charges for sewerage, water services, and drainage basin utility districts--Amount and basis of charges--Surcharge on water bills. The governing body of each municipality issuing bonds under this chapter shall establish and collect equitable rates, charges, or rentals for all services and benefits furnished by such sewerage and water facility system or systems or drainage basin utility districts. The rates, charges, or rentals shall be sufficient to produce net revenues adequate to pay the principal of and interest on the bonds issued hereunder as such principal and interest become due, and to create and maintain reasonable reserves therefor. The charges may include a reasonable minimum amount for standby or ready-to-serve benefits and may be based on any factors reasonably related to the character, quantity, and quality of the service or benefits furnished. Rates and charges for sewerage improvements may, but need not, be established as a surcharge on water bills to the extent that the governing body shall determine either that water consumed is a fair measure of sewage produced or that the sewerage improvement prevents pollution of the water supply.
